- Rhino

## A LANGUAGES

- French
- **English**
- Russian
- Turkish

Driven by a passion for understanding and promoting sustainable energy practices, I leverage behavioral insights and innovative interventions in my research. As a Ph.D. candidate, and holder of a Master's degree in Solar Energy: Economics, Law, and Management, my thesis centers on evaluating the impact of awareness-raising initiatives and strategies to reduce energy consumption on user behavior and thermal comfort preferences.

#### CONFERENCE PRESENTATIONS

## "Behavioural Patterns and Energy Consumption in French Residential Buildings"

11th Annual Conference of French Association of Environmental and Resource **Economists** 

5-6 September 2024 at the University of Strasbourg

#### PROFESSIONAL EXPERIENCE

## Ph.D. CANDIDATE | IREGE LABORATORY | UNIVERSITY OF SAVOIE MONT BLANC

#### October 2023 - Present

Researching the effectiveness of behavioral interventions in promoting energysaving practices and enhancing user comfort in residential and public buildings. This study involves analyzing databases using latent class analysis, econometrics, structural equation modeling, item response theory, the theory of planned behavior, and other methodologies.

#### INTERNSHIP | IREGE LABORATORY, HES-SO HEPIA, LOCIE

#### February 2023 – July 2023

Evaluation of the impact of awareness-raising actions and measures to reduce energy consumption on user behavior and comfort. This research, conducted during master's degree, was granted by Solar Academy and Conseil Municipal Savoie Mont Blanc and served as a foundation for pursuing my Ph.D.

#### PEDAGOGICAL TUTORING | UNIVERSITY OF SAVOIE MONT BLANC

#### Novembre 2022 – Juin 2023

Tutoring sessions for Master Solar Energy students to deepen their understanding of course material in subjects such as environmental economics and statistics.

#### ACADEMIC BACKGROUND

## MSc. SOLAR ENERGY: LAW, ECONOMICS AND MANAGEMENT UNIVERSITY OF SAVOIE MONT BLANC

## 2021 - 2023

Program provided a comprehensive understanding of the interdisciplinary aspects of solar energy, focusing on the legal frameworks, economic principles, and management strategies relevant to the solar energy sector.

#### **BSc. GEOGRAPHY AND PLANNING** UNIVERSITY OF SAVOIE MONT BLANC

#### 2020 - 2021

Program focused on the principles of geography and spatial planning, emphasizing the relationship between human activities and the environment. It includes urban planning, geographical information systems (GIS), providing a solid foundation for understanding regional development and sustainable land use.

#### BSc. TOURISM AND SOCIO-CULTURAL SERVICE TOURISM AND MANAGEMENT UNIVERSITY

#### 2008 - 2012

Principles of tourism management and socio-cultural services, providing insights into the tourism industry, and community engagement. Coursework included topics such as tourism marketing, skills necessary for effective management in the tourism sector.
