Kristian COLLETIS-WAHL is a lecturer in economics at the Faculty of Law, Université Savoie Mont-Blanc. He is principal associate consultant at Technopolis | Group, and a trainer in public policy evaluation for the European Commission, the World Bank, the European Court of Auditors and the European Commission. He provides government training, and lectures in Masters programs dedicated to evaluation (Ecole Nationale d'Administration, Université Paris Panthéon Sorbonne, AgroParisTech). He specializes in impact assessment, contribution analysis and participation in public decision-making.

After a Master's degree in industrial economics at UPMF in Grenoble, followed by a PhD at Université Paris-Saclay, Kristian began his career at Reverdy Associés, where he assessed the impact of European technological and structural policies. He was a researcher in transport economics at IFSTTAR, where he developed impact assessment methodologies for major transport infrastructures (airports, TGV network, motorway networks) and socio-economic impact observatories for the DGITM and MESR, the European Commission and French regions. He was mission director at Eureval, where he contributed to the development of impact assessment methods for the European Structural Funds (DG REGIO, DG AGRI, DG MOVE), and to the management of evaluations and training courses for the European Commission, several European governments and the European Court of Auditors. He has been scientific secretary and member of high-level European groups. He has been a lecturer in economics at the Université Savoie Mont-Blanc since 2005, while continuing to work with EUREVAL and other evaluation consultancies such as DMI International, Pluricité, Espacité, Learning Avenue, Vizéa and Technopolis Group. He is involved in evaluation missions, training courses and expert appraisals at local, national and international levels, notably for the Presidency of the Republic of Côte d'Ivoire, AFD, Expertise France, Bpifrance and the CNES.

Kristian is involved at regional level in the democratic design of public policies and their evaluation. He was a member of the bureau, then co-President of the Greater Annecy development council, and assists a group of Haute-Savoie parliamentarians in enhancing the democratic quality of their actions. His research focuses on economic impact assessment, policy design and AI-enhanced local democratic functioning.
